PremierGarage New Sliding Door Garage Cabinets Recognized for Innovation in Elite List

Phoenix, Ariz. (September 15, 2008) -- *Professional Remodeler* magazine has named [PremierAccess](#), manufactured by [PremierGarage](#), as one of the 50 Most Innovative New Products 2008. The program recognizes technological advances in the residential building market.

The newest [garage cabinets](#) introduced by PremierGarage offer an innovative by-pass sliding door system designed for maximum convenience. Ideal for smaller spaces that do not have adequate room for swinging doors, PremierAccess allows consumers to retrieve or store their belongings without having to move their vehicle.

PremierAccess will be available in October and can be ordered by contacting a local franchise location. A listing of franchises can be found at www.premiergarage.com.

"We are honored by Professional Remodeler's recognition of PremierAccess and its true space saving innovation," said Brad Randolph, vice president of business development of PremierGarage. "Because we carefully designed the sliding system to work with existing designs, both new and current customers can reap the benefits."

The durable PremierAccess cabinets feature an upper and lower track mechanism, which prevents the doors from coming out of their tracks, along with an integrated full-length handle for smooth sliding action. Available in all PremierGarage finishes, customers can mix and match the new sliding doors with the company's traditional garage cabinets for the perfect custom garage solution to meet their individual needs.

50 Most Innovative New Products were featured in the September 2008 issue of [Professional Remodeler](#) magazine and can be viewed on www.ProRemodeler.com.

About PremierGarage
