## **PremierGarage Debuts Seamless Powder-Coated Cabinets in Contemporary Colors and Styles**

**Phoenix, Ariz. (January 12, 2009)** – Car enthusiasts attending the Barrett-Jackson collector car event this week are getting a first look at the newest line of cabinetry from [PremierGarage](#). Dubbed PremierOne Powder-Coated Cabinets, these stylish and high-tech cabinets are initially available in Tech Red and Slate. Beyond just the contemporary colors and styling, the state-of-the-art design used in the manufacturing process of the cabinets means they can stand up to even the harshest climates, eliminating concerns of rusting, bowing or warping.

“With the introduction of PremierOne Powder-Coated Cabinets, we are truly setting a new standard in both style and design. Whether you are looking for a sharp new contemporary look for storage or you are a car enthusiast wanting to create your very own ‘race shop’, these new cabinets offer you the flexible and modular options you need,” said Brad Randolph, vice president of sales and business development for PremierGarage.

Durability is not sacrificed for style with PremierOne Cabinetry. Because the cabinets are completely encapsulated, they are moisture, stain and chip resistant and more durable than liquid paint or melamine alternatives. Maintenance and cleaning is achieved by simply using a damp cloth or all purpose cleaner.

The [PremierOne Powder-Coated Cabinets](#) are also the next step in the company’s continuous commitment to [environmentally friendly](#) products and design. Zero volatile organic compounds (VOCs) are emitted during the manufacturing process of the PremierOne cabinets. In addition, the new line is California Resources Board (CARB) Phase 2 compliant, meeting the aggressive limits for emissions of formaldehyde in composite wood products.

Not restricted to just the garage, the PremierOne Powder-Coated Cabinets are also ideal for commercial use in offices, medical buildings and academic institutions. Featuring one-inch thick adjustable shelving and off-the-floor mounting, the new powder-coated cabinets can be customized to accommodate either hinged or sliding doors with various door pull options available.

PremierOne Powder-Coated Cabinets are immediately available and can be ordered by contacting your local PremierGarage franchise location. A listing of franchises can be found at [www.premiergarage.com](http://www.premiergarage.com).

**About PremierGarage**
